Class III

Assinment Date : 04/05/2020

To be Completed by : 10/05/2020

Guidelines : Complete the work given in different subjects according to the instructions given along with each subject. It has to be submitted in school once the school reopens

---

Subject : **GENERAL SCIENCE**

- To understand the concept better please click on the link below:

<https://youtu.be/DFfiB9xJiwQ>

**Note: Make ONE SIDE plain notebook for General Science and copy down this work.**

**Lesson 1: (Living and Non-living Things)**

**Fill in the blanks:**

1. Fish breathe through **gills**.
2. Roots grow and move **downwards** into the soil for water.
3. Green plants use air, water and **sunlight** to make their own food.
4. Animals give out waste such as **urine** and **sweat**.
5. A **sapling** grows into a big plant such as a tree.
6. Plants remove waste through their **leaves** and **barks**.

**Name the following:**

1. Period between the birth and death of a living thing- **lifespan**
2. Pores on the underside of the leaves through which plants breathe- **stomata**
3. Tiny holes present on an insect's body for breathing- **spiracles**

**Answer the following questions:**

**Q.1 Why do animals move from one place to another?**

**A.1** Animals move from one place to another in search of food, water and shelter. They also move to protect themselves from their enemies.

## **Q.2 How do animals and plants feel changes around them?**

**A.2** We feel changes around us with the help of our five sense organs- eyes, nose, ears, tongue and skin. Insects such as cockroaches have feelers that help them to feel. Plants feel the warmth of sunlight and grow towards it.

## **Q.3 What is the difference between living and non-living things?**

**A.3**

<u><b>Living things</b></u>	<u><b>Non-living things</b></u>
1. Living things can breathe.	1. Non-living things cannot breathe.
2. Living things grow.	2. Non-living things do not grow.
3. Living things need food.	3. Non-living things do not need food.

## **Q.4 What is the difference between plants and animals?**

**A.4**

<u><b>Plants</b></u>	<u><b>Animals</b></u>
1. Plants do not move from one place to another.	1. Animals move from one place to another.
2. Plants make their own food.	2. Animals eat plants and other animals.

## **Q.5 What is reproduction? How do living things reproduce?**

**A.5** The process by which living things produce more of their own kind is called reproduction. Some living things give birth to babies while some living things lay eggs from which the babies hatch out. Plants produce new plants from their seeds, stems and roots.
